

**Learn if this health benefit plan
can save your company money on
group health coverage.
Groups from 1—100 welcome!**

This plan, introduced in 2016, has offered low average base rate increases per year. Thorough medical underwriting and financial oversight have created a stable rate environment for our participants.

We offer multiple plan designs to employers, composite (not-age-banded) pricing and additional services like Health Reimbursement Arrangements (HRA) and Health Savings Accounts (HAS). Our plan also provides the plan document which is required by the Department of Labor.

Tired of an agent that you can't count on? Tired of hearing, "We can't do that"? Builders Exchange Benefits, the sole broker for this plan, prides itself on impeccable service before and after the sale. Our staff provides you with the highest level of service along with products from only the top carriers in the state.
